# GEOLOGY AND MINERAL RESOURCES OF NIGERIA

Combined from the NGSA 1:2,000,000 Geological Map (2011) and Mineral Resources Map (2nd edition, 2023) · WGS 84 longitude / latitude (EPSG:4326)

## GEOLOGICAL UNITS BY ERA

- Cenozoic cover (Quaternary-Neogene) (304k km²)
- Mesozoic sediments (Cretaceous) (177k km²)
- Neoproterozoic, Pan-African deformed (56k km²)
- Neoproterozoic-Palaeozoic (136k km²)
- Archaean / Palaeoproterozoic basement (223k km²)
- no era on the sheet (Gdss, s, P, Gmsh, BCT) (5k km²)

Geology: 96 units + water (1), 907,157 km² — no overlaps, no inland gaps, 2023 boundary · Minerals: 1,323 printed symbols, point = measured centre of the glyph (± 0.35 km); 1,179 inside Nigeria; 1,305 named (81 % accurate), 18 withheld
