GEOLOGICAL MAP OF NIGERIA

EXPLANATIONS

- Geological Boundary Exact
- Geological boundary approximate
- Geological Boundary inferred.
- Geological Boundary Transitional
- Volcanic Plugs&Pipes
- Major Fractures / Faults
- Fractures / Fault (inferred)
- Ridges
- Anticlinal axis..
- Synclinal axis..

- Roads
- Railway
- Rivers

MAP HISTORY

The Nigeria Geological Survey Agency (NGSA) fully concious of the fact that Geological Maps are planning tools for the economic development of any nation, embarked on the production of the 2004 edition of Geological Map of Nigeria and other maps.

Geological data were collected from various sources. Geological and Mineral maps were compilled initially on state - by - state basis. In the process, the existing publications and records of NGSA were re-appraised, credible references were obtained from learned journals, in addition, information were obtained from the oil companies and other sources.

A peer review group, assembled for this purpose, moderated the data which were also authenticated through field checks by the NGSA. The present edition therefore contains greater Geological details and nomenclatures than the earlier edition. As far as possible, the Granite - Gneiss and the Schist complexes have being differentiated lithologically. An attempt has also been made to distinguish "pure Quartzites" and "Quartz Schist" from sillicified "Sheared Rocks" or "Mylonites", thus a new tectonic unit is being erected for the latter.

Data Collection:- From all NGSA state offices nationwide and the Federal Capital Territory (FCT) supervised by Geologist in charge.
Data Compillation and checking by:- Mr. V. Ozoadibe, Mrs. S. L. Salau, Mr. A. Afolabi, Mr. Garuba, (Assistant Directors), Mrs. Grace Bukar, Miss Fatima Bahago (Senior Geologists).

Photo Mechanical work supervised by Mrs. Kate Oyewole (PTO I)
Cartographic reproduction and design - supervised by Mrs. B. O. Fashola (PTO I)
Digital Processing - Supervised by Mr. H. O. Davies (Assistant Director)
Peer Review - Moderated by Mr. O. Ezewu (Director, Regional Geology)
The entire project was undertaken by committee on production of maps.
Mr.. O. Oluyide (Deputy Director), under the chairmanship of
Dr. Siyan Malomo (Director General)

PUBLISHED BY THE AUTHORITY OF
THE FEDERAL REPUBLIC OF NIGERIA

PROF. SIYAN MALOMO
Director General

N.G.S.A.

NEOGENE	Recent	Holocene	Al	Alluvium	— Sediments
			MWS	Sands,Gravels and Clay	— Meander belt, back swamps, fresh water swamps
			AB	Sands and Pebbles	— Abandoned Beach Ridges
			MS	Sand, Clay and Mangrove Swamps	— Mangroves swamps
			SDem	Sand,Clay and Swamp	— Sombreiro Deltaic Formation
		Pleistocene - Pliocene	Cst	Sands, Clays, siltstones and limestones	— Chad Formation
			Bmd	Sand and Clay	— Benin Formation
			b	Younger Basalt	— Niwer Basalt
			Ub	Basalt	— Older Basalt
	TERTIARY TO RECENT VOLCANICS	Oligocene - Miocene Upper Eocene	OAlgs	Lignite,Claystone and shale	— Ogwashi - Asaba Formation
			Ish	Clay clayey sands and shale	— Ilaro Formation
PALAEOGENE		Middle Eocene	Dwss	Sandstone and Clay	
			Gbl	Sandstones and Clays	— Gwandu Formation
			Wss	Sandstone and Clay	
			Esh	Shale and limestone	
		Lower Eocene	Imsh	Clay and Shale with Limestone Intercalations	Imo group
		Paleocene	Kss	Sandstone,shale and Clay	— Kerri - Kerri Formation
			Dsh	Shale	— Dange Formation
			Kls	Limestone	— Kalambaina Formation
			Gss	Sandstone,Siltstone,Shale and ironstone	— Gombe Formation
		Cenomanian / Maestrichtian	Ajsf	False - bedded sandstone	— Ajali Formation
			Nksh	Coal, shale and sandstone	Nsukka Formation
			Nksh	Sandstone, limestone, Coal	
			Asl	Sandstone and Limestone	— Abeokuta Formation
			Mcsl	Coal,Sandstone and Shale	— Mamu Formation
		Cenomanian	Bssf	Sandstone and Ironstone	— Bassange Formation
			Nsh	Shale and mudstone	— Nkporo Formation
			Afsh	Shale and Limestone	— Awgu - Formation
			Tst	Sandstone, siltstone and shale	— Taloka Formation
			Gls	Limestone	— Dukamaje Formation
		Senonian	Wss	Sandstone, clays and shale	Dukamaje and Wurno Formation Rima Group
			Wcs	Clays and loose sandstone	
			Wsh	Shale (Phosphate nodules)	
			Ts	Siltstone and Sandstone	
		Turonian	Psh	Shale,limestone and sandstone	— Pindiga Formation
			Lass	Sandstone,shale and sandyshale	— Lafia - Wakari Formation
			NPss	Feldspathic sandstone and siltstone	— Nupe Formation
		Pre maestrichtian	Glcg	Pebbles and grit	Gundumi - Illo Formation
			Glss	Clay grit and pebbles	
			Glgst	Gravel and sand	
		Albian / Cenomanian	Fish	Blackshale, siltstone and sandstone	— Fika Formation
			Ess	Sandstone	Eze - aku Group
			Esh	Blackshale, siltstone and sandstone	
			Mlst	Limestone and Siltstone	Awi - Mfamosing Formation
			Awst	Sandstone	
		Albian	Yfs	Shale, sandyclay, calcerous sandstones	— Yola - Bima - Yolde Formation
			Bss	Feldspathic sandstone calcerous sandstone and shelly limestone	— Bima Formation
			Afish	Shale and limestone with sandstone intercalations	— Asu River group
JURASSIC	Pre Albian/ young Granite Series		MyP	Quartz porphyry	
			MyG	Granite and granite porphery	
			Myt	Ignimbrite	
			Mys	Syenite, quartz-syenite and gabbro	
			MGp	Granites and granite porphyry	
			MyP	Porphyry / quartz porphyry	
PRE - CAMBRIAN TO CAMBRIAN	Pan - African Older Granite Series		r	Rhyolite	
			Ayr	Rhyolite	
			AyG	Biotite granite	
			A/A	Trachy- andesine	
			P	Pegmatite	
			D	Dolerite	
			ODh	Bauchite quartz- diorite	
			OGd	Biotite and biotite hornblende granodiorite	
			OGS	Syenite,mainly of pyroxene diorite composition	
			OSg	Coarse biotite and biotite muscovite granite	
			OGh	Coarse hornblende granite	
			OGf	Fine-grained biotite granite	
			OGm	Medium-to coarse-grained biotite granite	
			OGu	Undifferentiated granite,migmatite and granite Gneiss	
			OGCh	Charnockitic rocks	
			OGt	Gabbro and quartz gabbro	
	Meta - Sedimentary / Meta - Volcanic Series		MV	Meta Volcanic Meta Sedimentary including pebbly schist	
			Sa	Amphibole Schist,Amphibolite	
			BIF	Banded Iron Formation	
			Sp	Slate phyllite and meta siltstone, locally hornfelstic / carbonaceous	
			m	Marble	
			Sf	Fine-grained flaggy quartzite and Quartz Schist.	
			Qs	Quartzite, massive and schistose, also occuring as ridges	
			MS	Pelitic Schist / Muscovite Schist	
			Su	Undifferentiated schists,including phyllities.	
			Mc	Meta-conglomerate	
	Migmatite - Gneiss Complex		bS	Biotite Garnet Gneiss Schist	
			bG.h	Biotite hornblende gneiss	
			OPg	Porphroblastic Gneiss	
			GG	Granite Gneiss	
			Ge	Granulite and gneiss	
			BG	Banded gneiss / biotite gneiss	
			MaG	Migmatitic augen gneiss	
			MG	Migmatitic gneiss	
			M	Migmatite	
	Cataclastic Rocks		qs	Silicified, sheared rocks, large quartz veins	
			My	Mylonites	
			aMy	Mylonites interlayered with amphibolites
