GEOLOGY AND MINERAL RESOURCES OF NIGERIA

Combined from the NGSA 1:2,000,000 Geological Map (2011) and Mineral Resources Map (2nd edition, 2023) · WGS 84 longitude / latitude (EPSG:4326)

GEOLOGICAL UNITS BY ERA

- Cenozoic cover (Quaternary-Neogene) (319k km²)
- Mesozoic sediments (Cretaceous) (170k km²)
- Neoproterozoic, Pan-African deformed (48k km²)
- Neoproterozoic-Palaeozoic (136k km²)
- Archaean / Palaeoproterozoic basement (223k km²)

Geology: 92 units + water (1), 907,157 km² — no overlaps, no inland gaps, 2023 boundary · Minerals: 999 localities, 80 commodities, each joined to its host unit · 842/999 on a printed mineral symbol (84 %), the rest label-only, σ ± 10 km
