GEOLOGY AND MINERAL RESOURCES OF NIGERIA

Combined from the NGSA 1:2,000,000 Geological Map (2011) and Mineral Resources Map (2nd edition, 2023) · WGS 84 longitude / latitude (EPSG:4326)

GEOLOGICAL UNITS BY ERA

- Cenozoic cover (Quaternary-Neogene) (308k km²)
- Mesozoic sediments (Cretaceous) (182k km²)
- Neoproterozoic, Pan-African deformed (57k km²)
- Neoproterozoic-Palaeozoic (137k km²)
- Archaean / Palaeoproterozoic basement (225k km²)

Geology: 1,518 unit polygons in 92 units, 1,509 dated · Minerals: 999 localities, 80 commodities in 8 groups, each joined to its host unit · 842 of 999 points sit on a printed mineral symbol (84 %); the rest are label-only, σ ± 10 km
